

# Are You Prepared for a Data Breach Review? We are.

In our digitized world, sensitive information is exposed to data breach, leading to theft, vandalism and ransom.

Having a data breach review team at the ready is critical to ensuring a proper and timely response to a breach.

IT security systems are vulnerable to breach, leaving valuable data such as PII/PHI or Intellectual Property exposed and at risk. Timely response and management

of a data breach can mitigate potential lawsuits, minimize disruption of business operations and limit financial exposure.

## Be confident in your ability to respond to a data breach with Hire Counsel's Data Breach Managed Review.

**Hire Counsel will help you determine exposure to mitigate risk and ensure compliance.**

Our experienced teams are ready to mobilize anywhere, anytime. Project Managers have in-depth knowledge of analytics, data identification and document review. Data breach reviewers have various skill sets specific to data breach reviews and are proficient in alternative workflows.

We understand the importance of determining exposure and allowing timely notification to comply with legal and contractual obligations.

### Our Data Breach Managed Review will:
